## **PSG SAFETY EYEWEAR**

Raising general eye safety awareness and offering the broadest range of high quality eye protection solutions.

## THE LEADING CERTIFIED AND LICENSED WHOLESALE MANUFACTURER OF PRESCRIPTION SAFETY EYEWEAR

PSG is licensed to manufacture prescription eyewear under SAI Global license #SMKH 21382, providing the highest level of eye protection, while satisfying each individual's need for style and comfort.

PSG places high importance on customer service, offering extensive support to our customers including training on safety and eye protection.

## **FLEXIBLE ORDERING** AND BILLING SYSTEMS

PSG offers a fully integrated web prescription ordering and billing system providing 24/7 ordering capabilities with accuracy.

Full order tracking, order history and order authorisation is provided by our system, offering flexibility and the ability to be customised to suit different business models.

## THE LARGEST RANGE OF CERTIFIED PRESCRIPTION SAFETY EYEWEAR

We provide the largest selection of styles, shapes and materials to satisfy the needs of workers. Being a division of Essilor Australia, PSG has access to a wide range of outstanding quality lenses and technologies.

### **DEDICATED SUPPORT**

The PSG Business Development Team are available to discuss your company, local community or optometry practice safety eyewear needs.

## THE WIDEST NETWORK OF **OPTOMETRISTS IN AUSTRALIA AND NEW ZEALAND**

PSG has partnered with over 850 "Agents" (Optometrist stores) to service a wide range of locations around Australia and New Zealand.

We also offer onsite servicing if required to some far and remote locations around Australia. Ask PSG Customer Service or your local PSG Business Development Manager for more information.

## **FAST DELIVERY TIME**

PSG ensures that your company staff and optometry practice clients receive their protective eyewear in the shortest time frame possible.

## SAFETY STANDARDS

According to the Australian Commonwealth Work and Health Safety Act 2011, it is an employer's duty to provide suitable protective clothing and equipment to employees. This includes prescription safety glasses.

"The person conducting a business or undertaking (PCBU) who directs the out of work must provide the personal protective equipment to at the workplace, unless the personal protective equipment has provided by another person conducting a business or undertaking1"

In New Zealand, the Health and Safety at Work Act 2015 (HSWA) requires PCBUs (persons conducting a business or undertaking) to take all reasonably practicable actions to eliminate or minimise risks to the health and safety of workers (and others that may be at risk from the work being done). This includes protecting people's eyes.

To be compliant with these requirements, it is not enough to simply supply some protective side shields and/or plastic lenses. Protective prescription eyewear must comply with the AS/NZS 1337.6 & AS/NZS 1337.1 standards.<sup>2</sup>

## **AS/NZS 1337.6**

## Personal eye protection - Prescription protectors against low and medium impact.

AS/NZS 1337.6 specifies the minimum requirements for prescription eye protectors against low and medium impacts from flying particles, fragments and splinters in the workplace. Protective Prescription Eyewear must comply with the AS/NZS 1337.6 standard. Prescription eye protectors complying with this Standard are intended to give both impact protection and prescribed refractive correction of vision. Correct identification markings need to be specified on the frames and lenses.

The standard requires that every pair of spectacles, which is claimed to meet the standard, should be supplied with that manufacturer's official documentation (AS/NZS 1337.6 Section 6).

This documentation will normally assure the product is Certified and compliant. Without documentation the spectacle may not meet the requirements.

Impact and penetration testing have to be conducted as specified by AS/NZS 1337.6 A projectile of 6.00mm diameter steel ball is directed at a predetermined speed against a protector to test its resistance to medium impact velocity. The minimum requirement of AS/NZS 1337.6 for medium impact is 45 m/s; approximately 162km/h.

## **AS/NZS 1337.1**

## Personal eye protection - Eye and face protectors for occupational applications

AS/NZS 1337.1 specifies minimum requirements for nonprescription eye and face protectors and associated oculars.

They are designed to provide protection for the eyes and faces of persons against common occupational hazards such as flying particles and fragments, dusts, splashing materials and molten metals, harmful gases, vapours and aerosols.

The aim of this Standard is to assist in the provision of safe, efficient and comfortable vision in the occupational situation, including consideration of the need for protection against sun glare and optical radiation in the natural environment.

<sup>1.</sup> Australian Work Health and Safety Regulations 2011, Part 3.2, Division 5:44.

## **CERTIFICATION VS COMPLIANCE**

### Certification

Certification means that your product has actually been Certified to be in conformance (compliance) with all the requirements of the Standard by a third party.

In essence, certification is proof of a basic compliance claim. Being Certified should be seen as a step above just being compliant, because certification is provided by a third-party entity.

## Compliance

Compliance means that the product fully adheres to the requirements of the Standard. Internal testing is completed, however this product range is not tested by a third party.

Compliance for PSG means the glasses are still made in the same Certified manufacturing laboratory, however the item may simply fall outside of prescription ranges of certification.

## **How PSG Can Help**

PSG frames are Certified and manufactured to prescription ranges that accommodate approximately 90% of the population. In saying this, PSG also offers product 'compliant' to the Standard outside of Certified prescription ranges through our local manufacturing laboratory in Sydney, NSW.

Contact PSG Customer Service or your Business Development Manager for further information.

## **CAPABILITY STATEMENT**

Prescription Safety Glasses (PSG) is the leading Certified and licensed wholesale manufacturer of Prescription Safety Glasses

PSG Eyewear products meet the following standards:

- AS/NZS 1337.6
- ✓ AS/NZS 1337.1
- ✓ AS/NZS ISO 21987

All PSG products come with:

- ✓ AU\$20,000,000 Product Liability
- ✓ Insurance Policy
- ✓ Guarantee of manufacture under ISO 9001:2008
- Certificate of Authenticity, 100% Certified safety eyewear by SAI Global and our third party testing agency

PSG is registered under **Standards Mark license SMKH21382** to manufacture under the AS/NZS 1337.6 standard.

## WORKPLACE EYE PROTECTION

## **DID YOU KNOW?**

OF EYE INJURIES CAN BE PREVENTED. WEAR CERTIFIED EYE PROTECTION.

## Eye protection on the job

Approximately 60% of all eye injuries occur in the workplace.

## Types of eye injuries

Different types of eye injuries include:

- ✓ Scratches or cuts
- Foreign bodies
- Thermal burns

Any job that involves airborne particles or hazardous substances carries a risk of eye injury. The eye is extremely delicate and permanent vision loss can result from a relatively minor injury.

## Ageing eyes pose a work hazard

Our eyes are very complex, yet we often take for granted that our vision will be perfect as we age. The reality is that undiagnosed visual problems may, potentially, put us and others in danger. Workers aged over 40 face increased safety risks as an age-related condition called presbyopia affects their eyesight<sup>2</sup>.

## Did you know?

- ✓ More eye accidents at work happen on Friday than any other day during the week<sup>3</sup>.
- ✓ In 70% of cases, the injury was caused by contact with an object or equipment.
- 90% of all workplace eye injuries can be prevented by wearing Certified eye protection.

## What can you do?

- Always take a common sense approach to hazardous activities.
- ✓ Work with your employer to eliminate potential eye hazards in the workplace.
- Always wear Certified safety eye protection if required.
- ✓ Don't substitute proper eye protection with normal glasses or sunglasses.
- ✓ Take an eye test to ensure that your vision is optimal for your particular job.

## **PSG FRAMES**

All PSG frames are manufactured to exceed regular ophthalmic frame standards. With fully Certified safety frames in our range, PSG has the largest selection of styles, shapes and materials to satisfy the needs of workers.

All PSG frame models are tested as part of SAI Global audited QA system and provided with full documentation as per the standard.

## PLASTIC (NON-CONDUCTIVE) FRAMES

- ✓ Available in Plastic Positive Seal, Plastic and Plastic Metal-Free (i.e. Screwless)
- ✓ Positive Seal Plastic Frames are suitable for dusty and extreme outdoor working environments
- ✓ Plastic Frames are suitable for electrical environment work
- ✓ Metal-Free (Screwless) Plastic Frames can be used in 'Food Grade Environments'

## **METAL (CONDUCTIVE) FRAMES**

- ✓ Available in Stainless Steel and Titanium
- ✓ Have metal temples and lens frame carrier
- ✓ Not suitable for high voltage work, such as conducted by electricians and inspectors

## **CHOOSING A FRAME TYPE**

	Plastic Positive Seal	Plastic	Plastic (Metal Free)	Metal

- Injection moulded nylon front
- ✓ TR90 temples
- ✓ No exposed metal
- ✓ Dust dam insert
- ✓ Adjustable strap
- ✓ Integral extended shield design

Sizes

58

- Registered design injection moulded

## John Moore's Legacy

A firm believer in the importance of occupation-specific safety glasses, John Moore successfully joined the campaign for an industry standard to be established, leading to the release of AS/NZS 1337.6 in April 2007.

From then, he vigorously encouraged optometrists and industry safety specialists to adhere to the Standard to ensure  $that \ workers \ were \ protected. \ He \ worked \ with \ manufacturers \ to \ design \ and \ supply \ frames \ that \ met \ the \ needs \ of \ workers \ in \ needs \ of \ nee$  $industries\ from\ mining\ to\ construction,\ electrical,\ transport,\ healthcare\ and\ even\ flight\ maintenance.$ 

Unfortunately, John passed away a young man. But his legacy continues through the work of PSG in providing eyewear solutions throughout Australia and New Zealand every day.

## PSG NOW SUPPLIES NON-PRESCRIPTION SAFETY GLASSES FOR THE WORKPLACE.

Contact your **PSG Business Development Manager** to discuss how to incorporate these products into your existing supply agreements, or as an ECP – how to add this feature product category into your practice so that you can support your local business community and clients.

# NON-PRESCRIPTION SAFETY GLASSES - PLASTIC

Ugly Fish is a leading Australian eyewear label specialising in functional eyewear solutions. This includes sports products suited for those who live an active lifestyle, motorcycle riding eyewear, optical frames, children's eyewear and in particular; high quality and comfortable safety prescription frames.

Probably tougher than you are, the Ugly Fish safety eyewear range is designed to optimise and protect your vision so you can get the tough jobs done safely, and look good doing it.

All models in the Ugly Fish non-prescription safety eyewear range comply with the Australian Safety Standard AS/NZS 1337.1 for medium impact.

So whether you're a professional, a tradie, working in an underground mine or on a construction site, there's a pair of safety glasses to suit you.

## **PSG LENSES**

All PSG prescription lenses are brought to you by Essilor, and partner company Optical Supply of Australia (OSA)

Essilor is the world leader in developing and manufacturing optical lenses. Essilor premium spectacle lenses are the result of more than 150 years of advanced research, innovation and technology. PSG's exclusive association with Essilor provides you with a comprehensive, technologically advanced, high in quality optical product range.

#### **Lens Material**

All PSG prescription lenses are made with Polycarbonate material, an industrial safety, premium impact resistant material.

Polycarbonate exceeds all current and proposed requirements for medium impact safety products required by Australian and International Standards. Although some other materials may meet the minimum requirements of the safety standards, polycarbonate exceeds these requirements by more than double. Polycarbonate lenses are thinner and lighter in finished weight than any other medium impact material available today.

## **Lens Designs**

Everyone's eyes are different and so are the types of lenses used for vision correction. The lens type is the main characteristic of a spectacle lens. Single Vision, Progressive, Extended Focus or Bifocal, PSG has a solution for everyone.

## **Single Vision**

Single Vision lenses, as the name suggests, are for one aspect of your vision and have a single power over the entire lens.

Single Vision lenses are prescribed for one aspect of your vision. For example:

- Distance vision -Watching TV, driving, watching movies at the cinema etc.
- Intermediate vision -Working at your desk, computer work or playing music etc.
- Near vision -Reading a book, sewing or doing anything closer than arm's length.

## **Progressives** (Multifocals)

Progressive lenses cover all aspects of your vision in a single seamless lens. From distance to near vision and everything in between. They are the closest thing to natural vision. No need for ugly bifocals ever again.

Progressive lenses are the optimum solution for when our vision changes past 40 years of age. This is called presbyopia. The smooth change of prescription lets you watch TV and read at the same time.

Progressive lenses are the convenient solution for people who wear glasses all the time or for people who only need them for certain tasks.

## **Extended Focus** (Occupational)

The days of "reading glasses" are over. Extended focus lenses give you so much more. Why be restricted when you can have a lens to use for your near vision (reading etc.) and your desk and computer?

While most reading glasses restrict you to things closer than 50cm, Extended Focus lenses offer clear vision for tasks from 40cm to 2m or more. Perfect for the office, workshop or work area.

## **Bifocal**

Bifocal reading glasses feature distance vision correction at the top half of the lens and near vision correction at the bottom; perfect if you need help with both.

This type of lens is designed to conveniently work as both reading glasses and standard prescription eyeglasses, all in one frame.

## **BLUE-VIOLET LIGHT**

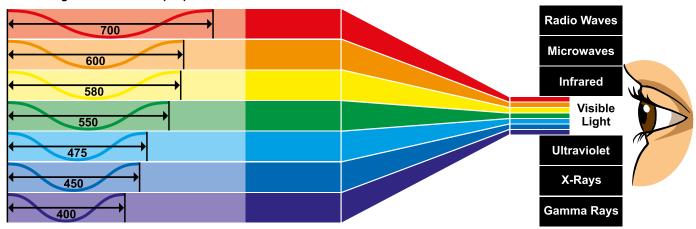

## **What is Blue-Violet Light?**

Blue-violet light is every everywhere; indoors and outdoors.

- Outdoors whatever the weather (sunny, cloudy or rainy), UV and blue-violet light are emitted by the sun.
- Indoors we are exposed to blue-violet light from sunrays passing through the windows or from screens.

## Wave Length in Nanometer (nm)

## **Our Blue-Violet Light Filtering Lenses**

Our blue-violet light filtering lenses cut UV and filter blue-violet light while allowing blue-turquoise light to pass through to not interfere with your circadian rhythm. Generally, blue-violet light filtering lenses have a slight residual tint, this is minimal on our Blue UV™ lenses.

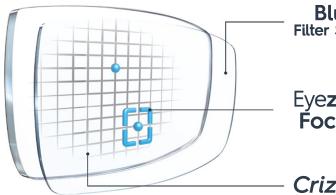

Our blue-violet light filtering lenses:

- · Are non-intrusive
- Filter blue-violet light
- Don't alter colour perception

## **SUNWEAR OPTIONS**

### **Polarised Lenses**

Polarised Lenses provided by PSG offer complete protection against UV rays and sun glare. They not only block bothersome glare, protecting the eyes and preventing headaches, but also reduce bright light, restoring the real colours of the environment by increasing contrast, sometimes up to 75%\*!

Polarised lenses provided by PSG are great for drivers as they improve driver reaction time by 1/3 of a second. That means that at 80 km/h the wearer will stop the vehicle 7 metres sooner\*\*.

**Without Polarisation** 

With Polarisation

<sup>\*</sup>Survey conducted on 27 wearers, comparing visual performance with polarised and non-polarised sunglasses under reflected glare by measuring contrast sensitivity – Saint-Maur R&D.
\*\*Survey contrast sensitivity and reaction times with polarized and tinted lenses in simulated driving daylight conditions – Institute for Vision research, Manhattan Vision Associates program #5331association for research in vision and ophthalmology 2009.

- $Compared \ to \ Transitions \ Vantage. \ Based \ on \ tests \ across \ materials \ on \ grey \ lenses \ @ \ 23^{\circ}C, \ using \ ISO \ 12312-1$ standard tests across materials on grey lenses at 23°C.
- Based on tests on polycarbonate grey lenses; up to 10% darker than Transitions Vantage @ 23°C and up to 5% darker @ 35°C.
- Based on tests across materials on grey lenses, achieving transmission below 45% @ 23°C behind a standard windscreen. The lens achieves a polarisation efficiency of up to 30% behind the windscreen. Based on tests across materials on grey lenses @  $23^{\circ}$ C, using ISO 12312-1 standard.
- The darkest in hot temperatures, in the car and offering the best overall blue violet light filtration across light situations" among clear to extra dark photochromic lenses. "Filtering blue-violet light (between 400 and 455nm ISO TR 20772:2018) among polycarbonate and CR39 grey lenses with a premium anti-reflective coating: filtering (i) up to 45% indoors at 23°C, (ii) up to 64% behind the windshield (iii) up to 86% outdoors at 23°C and (iv) up to 83% outdoors at 35°C.
- 6. Test carried out on grey CR39 and polycarbonate lenses with a premium anti reflective coating Blue-violet light is between 400 and 455nm (ISO TR 20772:2018)
- Clear to extra dark photochromic category. Tests across polycarbonate and 1.5 grey lenses using Transitions Optical's standard testing method. Outdoors at 35°C achieves <18%T. Behind the windscreen at 23°C achieves between 18%T and 43%T.
- 8. Compared to the previous Transitions XTRActive generation across materials tested on grey lenses fading back to 70% transmission at 23°C.

## **LENS COATINGS**

## Crizal® Sapphire, HR

Crizal® Sapphire, HR combines the finest Crizal® technologies to deliver the best antireflection coating overall.1

The Crizal® Sapphire, HR coating minimises reflections from both direct and wide angle/lateral light sources, both in front and behind the lenses, creating a virtually invisible lens.

This best-in-class transparency<sup>2</sup> is bolstered with High Resistance and High Surface Density technologies to resist scratches and smudges for transparency that stands the test of life.3

## Crizal<sup>®</sup> Prevencia

Crizal® Prevencia™ includes exclusive Light Scan Technology™, which selectively filters blue-violet light whilst allowing beneficial blue-turquoise light to pass through.

Additionally, Crizal® Prevencia™ also offers back surface UV protection while cutting reflections, smudges, scratches, dust and water.

## Crizal® Rock.

Crizal® Rock™ is the best combination against scratches and smudges.4

With high performance scratch resistance, UV protection, water and dust repellance, and Essilor's unique antireflection technology, Crizal® Rock™ offers exceptional durability like never before.5

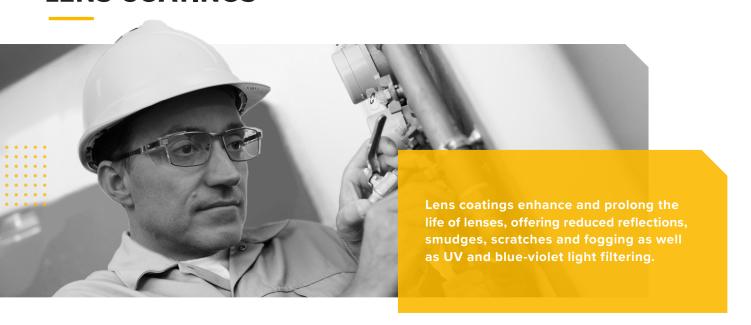

## Crizal® EasyPro

Crizal® EasyPro is the entry level product in the Crizal® family. It is known for its ease of cleaning compared to ordinary lenses.

Crizal® EasyPro reduces glare and reflections, resists scratches and smudges, repels dirt and water, and provides UV protection with an E-SPF rating of 35.6

- External laboratory tests and internal technical tests 2020. The word 'overall' refers to important anti-reflection coatings criteria, ranked through an external quantitative consumer study 2019. Perceived transparency based on in-lab trained consumers study 2021 third independent party FR (n=15 trained consumers) compared to the most globally known consumer lens-brands
- by consumers (2019 external brand tracking in 11 countries). External laboratory test stain release test 2020.
- External laboratories tests and internal technical tests in 2019. Combination here defined as the merger of 2 distinct criteria which are scratch resistance and smudge resistance Crizal® Rock™ coating rated best on smudge resistance and equal on scratch resistance, compared to the most known globally known lens brands by consumers (MSW brand tracking 2018 in 17 countries).
- Within the Crizal® coatings range. External laboratory tests and internal technical tests in 2019- compared to all previous generations of Crizal® coatings
- 6. Except 1.5 index clear or tinted without UV-cut, where E-SPF=10.

## **LENS COATINGS**

## **Optifog®**

Optifog is a unique hydrophillic coating with inherent anti-reflection and fog repellent properties. Thanks to the specific molecules of the innovative Optifog® Smart Textile, droplets that would usually result in fog and inhibit vision spread uniformly across the lens, for an invisible and fog-free effect.

This coating is ideal for professionals who frequently move from hot to cold environments or are required to wear masks or helmets, often experiencing foggy lenses. Optifog® lenses offer an optimised solution to the inconvenience of fog.

## **Neva® Coatings**

Exclusive to PSG Safety Glasses, NEVA Coatings effectively resist reflections, smudges, and scratches while providing optional benefits of UV protection and blue-violet light filtering. – ideal for industrial and commercial use. Neva Coatings are available in 3 options:

### Neva+

Enhances your patient's vision and comfort by reducing reflections, smudges and scratches while also repelling oil and water.

## **Neva Max UV**

The perfect combination – with reduced reflections, smudges and scratches plus back surface UV protection, for an E-SPF rating of 25.\*

## **Neva Blue UV**

Reflects away blue-violet light for improved contrast and comfort plus back surface UV protection for an E-SPF rating of 25.\*

## WARRANTY INFORMATION

### Effective May 2024

#### 1. General

In these Warranty Terms:

"Supplier" or "we" "us" or "PSG" means Essilor Australia Pty Ltd trading as 'PSG Eyewear', Level 34, 1 Denison Street North Sydney NSW 2060, and 10/69 Parramatta Road, Silverwater NSW 2128, ABN 96 002 659 458;

"Customer" means the person, firm, company or other legal person directly placing Order(s) with PSG, and whom sells the Product to the Individual Customer in the ordinary course of business. Dispensing Optometrist agrees to review and comply with its obligations and duties in these Warranty Terms;

"Individual Customer" means the natural person who ultimately takes ownership of a Product as wearer;

"Products" means the safety glasses which are the subject of sale by the Dispensing Optometrist to the Individual Customer;

 $\hbox{\bf ``Order''}\ means\ the\ Dispensing\ Optometrist's\ order\ for\ the\ Products,\ whatever\ its\ format$ (order form, fax, email, call to the Customer Service Team, through our ordering system or any other electronic format) and whether written or oral or as the case may be.

## 2. Prescription Safety Glasses (PSG) Warranty

Our Products come with guarantees that cannot be excluded under the Australian Consumer Law or New Zealand Consumer Law. Individual Customers are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. Individual Customers are also entitled to have the goods replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Any refunds will be provided directly to the

Subject to the warranty exclusions set out in Section 3 ("Warranty Exclusions") and compliance with the assessment procedures in Section 4 ("Assessment Procedures and Warranty Outcome"), PSG offers the warranties as stated below in respect of its Products during the applicable warranty period which are in addition to an Individual Customer's other rights and remedies available under law, including, importantly any rights and remedies the Individual Customer may have against the Dispensing Optometrist.

Item	Warranty Period from invoice date ("Warranty Period")	Special Conditions					
Quality of prescription safety eyewear							
Manufacturing		Covers manufacturing fault in materials or workmanship on the frames and lenses.					
Product Quality	1 year from date of delivery to Individual Customer	All of the Supplier's lenses are made with high quality materials. Supplier guarantees lenses will not warp, chip or discolour.					
Lens Coatings		Covers crazing, peeling or discolouring of lens coatings.					
Non-conformity of	prescription lenses						
Non-Conformity to order specification	30 days from delivery to Individual Customer	One pair of prescription safety eyewear per Individual Customer will be remade by Supplier in the event the frame recommended by the Dispensing Optometrist who submits the Order with us, is found to not meet the environmental and/or task requirements or is otherwise no fit for the purpose described by the Individual Customer at the time of assessment. Individual Customer may also have rights with the agent dispenser with whom they have a contract of sale.  i) Individual Customer must return the Product to the Dispensing Optometrist within 30 days of delivery. Dispensing Optometrist agrees to then immediately return to Supplier via 'PSG Customer Service' for assessment of non-conformity;  ii) For online purchases by an Individual Customer, the Individual Customer must call PSG Customer Service to explain non-conformity and to establish next steps. Individual Customer to follow instructions provided by PSG Customer Service on sending back the Product to the Supplier for assessment;  iii) Customer or Dispensing Optometrist must provide Supplier with all information reasonably necessary for confirmation of the non-conformity					
Non-adaptation for	prescription progressive lense	es s					
Progressive lens non-adaptation	90 days from delivery to Individual Customer	If an Individual Customer suffers "non-adaptation", Supplier will offer to produce a replacement pair using bi-focal or single vision lenses, thereby removing the adaptation risk, in consultation with the Individual Customer.  i) Individual Customer must return the Product to the Dispensing Optometrist who submits the Order with the Supplier, within 90 days of delivery. Customer agrees to then immediately return to the Supplier via 'PSG Customer Service' and provide Supplier with written notification of the difficulty of adaptation;  ii) For online purchases by an Individual Customer, the Individual Customer must call PSG Customer Service to explain difficulty of adaptation and to establish next steps. Individual Customer to follow instructions provided by PSG Customer Service on sending back to the Supplier the product for assessment.  iii) Dispensing Optometrist or Individual Customer must provide Supplier with all information reasonably necessary for analysis by the Supplier of the difficulty of adaptation;  iv) Excluded from this non-adaption warranty are bifocal, occupational or any other lens designs other than progressive lenses;  v) Excluded from this warranty are dispensing errors on the part of the agent practice technician, changes to heights, pupillary distances (PDs), frame, fit parameters, lens treatment and prescription, however, Individual Customer may have rights under its contract of sale with the Dispensing Optometrist.					
Cancellation, amen	dment or customer's prescript	ion change					
Cancellation or amendment	30 mins from order placement	Orders will be charged in full if the job is cancelled or amended more than 30 minutes after the order is placed.					
Spectacle Prescription Change	90 days from order placement	In the unlikely event that the Individual Customer's prescription changes within 3 months of date of delivery to the Individual Customer, the Supplier will remake the Product with the updated prescription at no cost under a one-time only goodwill policy. The Individual Customer must provide a printed or electronic copy of a current, non-expired prescription to Supplier to validate this request					

## WARRANTY INFORMATION

### 3. Warranty Exclusions

- (1) If the Australian Consumer Law, New Zealand Consumer Law, or any other law, applies to any Product and notwithstanding anything contained in any Order, the warranties and any guarantees implied thereby are implied into this document and the Individual Customer and Dispensing Optometrist shall have the full benefit of those provisions but only to the extent to which those warranties and/or guarantees are applicable and may not be excluded. All other warranties and guarantees not expressly provided in this document are excluded as far as permitted by law.
- (2) The Supplier shall not be liable in any way for any of the following:
  - a) Any defects in the Product that arise from the Dispensing Optometrist or Individual Customer's neglect, negligence, misuse, abuse, accidental damages like cracks or breaks, external action or from normal wear and tear, and/or;
  - b) Any other goods, products, materials, services and/or items of any kind whatsoever and regardless of howsoever the damage or defect may have occurred.
- (3) Any warranty shall be void if installation, operating or maintenance instructions are not observed, or if parts are replaced or materials used are not in accordance with Supplier's original product specifications unless the Dispensing Optometrist or Individual Customer can show with definitive evidence that the defect in question did not result from such non-observance of instructions.

## 4. Assessment Procedures And Warranty Outcome

- (1) It is the Dispensing Optometrist's and Individual Customer's responsibility to check the item references, quantities, condition, and conformity of the safety eyewear to the Order at the time of delivery.
- (2) To access the warranty, Customer must insure and return with carriage paid to Supplier's Customer Service Team, in the original packaging and be accompanied by a packing slip clearly stating the quantity and description of the products returned, the reason for the return and quoting the invoice number of the original delivery, received certificate and a copy of the delivery slip of the returned Product.
- (3) In the event the reason for the return is due to the Dispensing Optometrist's or Individual Customer's claim that the safety eyewear is/are defective, Supplier shall undertake technical examination of the safety eyewear in its original or equivalent packaging. If the Supplier determines in its sole discretion that the defects fall within the warranty set out in this document, Supplier undertakes at its option to:
  - (i) Repair the affected Product;
  - (ii) Replace the Product with a pair of safety eyewear from Supplier's current product range; or
  - (iii) Issue a credit in respect of the affected safety eyewear. The Supplier may refuse to remedy defects if the Individual Customer has not complied with the request to return the Products claimed to be defective.
- (4) In the event the Supplier elects to replace the affected Product or issue a credit note, the original returned Product will be the property of the Supplier. In the event the Supplier repairs the Product or declines the warranty, Supplier will return the Product to the Dispensing Optometrist or the Individual Customer with a copy of the assessment letter.
- (5) Items 1-4 above are subject to the obligations and requirements of the Australian Consumer Law and New Zealand Consumer Law.
